Emiral Global REWARD ECOSYSTEM (compensation plan)

Emiral is a natural herbal product company that creates an ecosystem for network users to promote healthy living and wealth

Emiral Global has created a platform that provides web-based health service solutions, as well as traditional service in the health, agriculture, and technology industries to create wealth through multilevel marketing.

To improve your wealth, Emiral Global built and scaled a **community-based MLM platform** using intelligent technologies to enable individuals worldwide to invest in or purchase high-quality natural and efficacious health products at affordable rates via sales **commissions and rewards** amongst others.

Emiral compensation plan is a **unilevel MLM plan** with touch of Binary, designed to reward hard work and team building efforts.

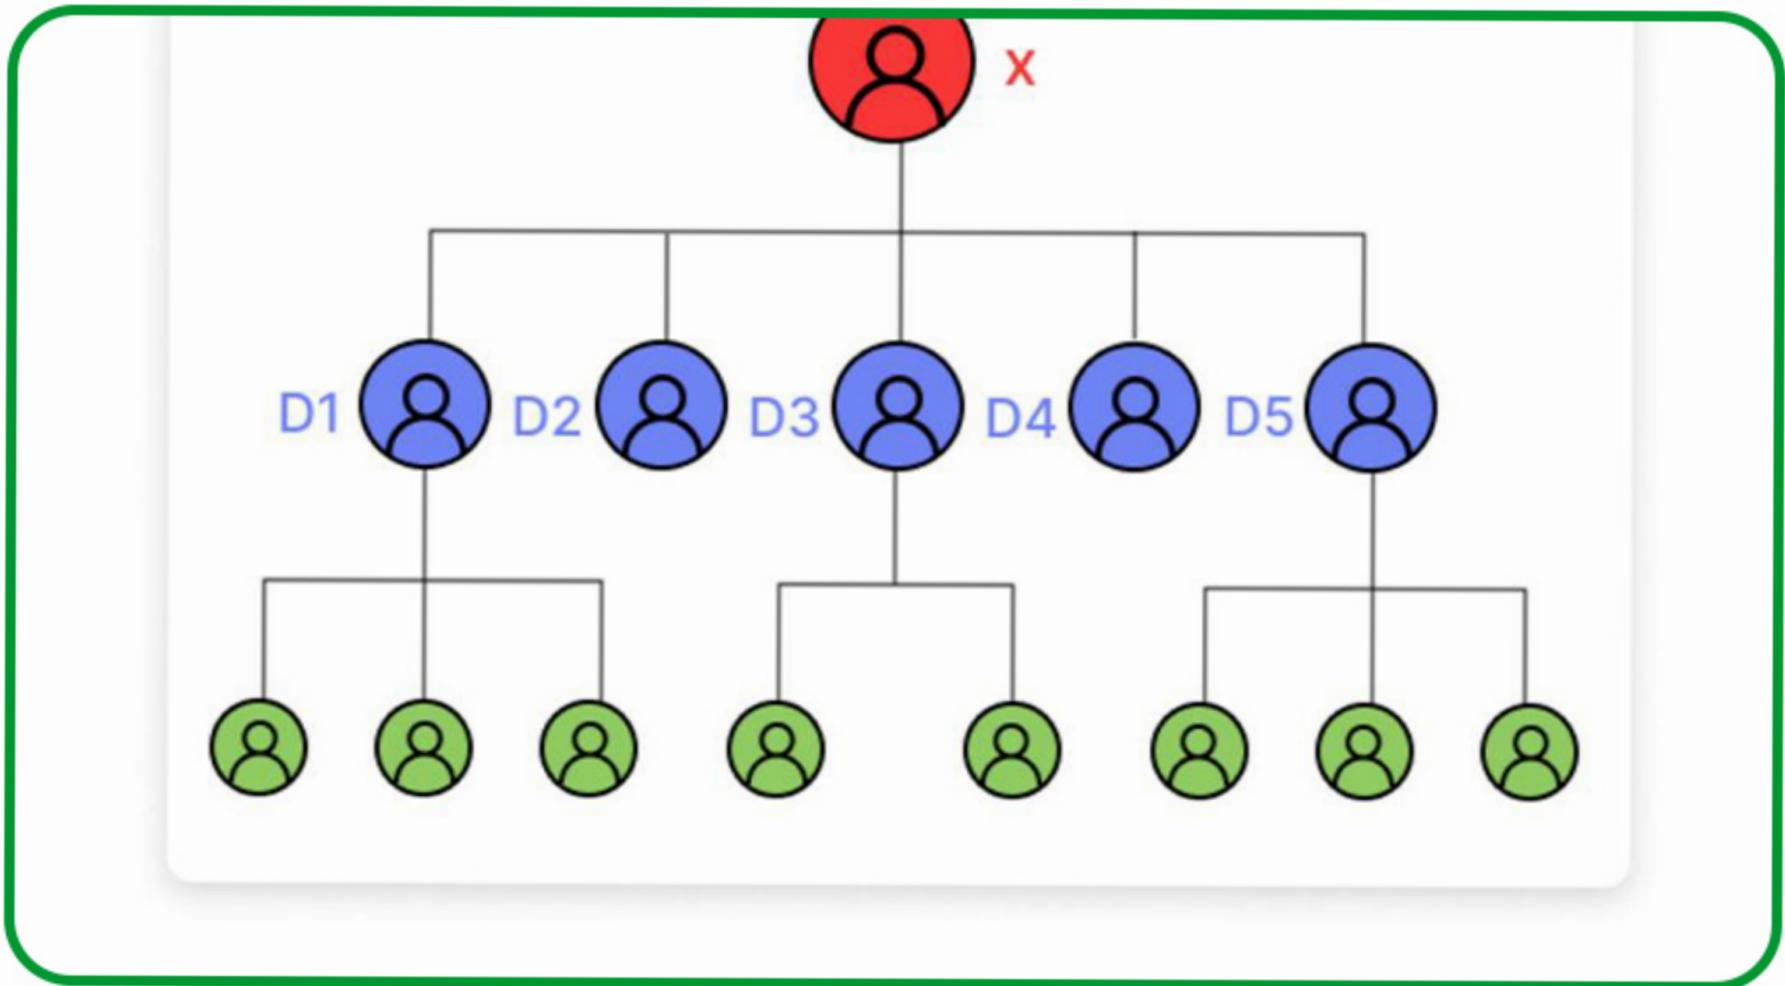

How does a Unilevel MLM Plan Work?

A Unilevel MLM plan is a compensation structure that allows distributors to recruit an unlimited number of members directly on their frontline (Level 1).

While there is no limit to the number of direct recruits a distributor can have, the structure generally rewards distributors for the efforts of their direct recruits, with the potential for earning smaller commissions from subsequent levels of their downline.

all the sponsored members of a distributor are placed directly on the first level, forming a single level of business. Distributors can recruit an unlimited number of frontline members, and commissions are based on their downline's sales volume.

This plan has no spillover, meaning that a distributor's efforts in recruiting members directly benefit them without reliance on the activity of others.
